Guidelines for Electronic Posters

Electronic posters display your work in a concise form, enabling conference attendees to grasp the essentials of the subject in a reasonable time frame. The e-posters will be available on the conference App as part of a 'Flipping book' and remain available following the conference.

Preparing an electronic poster is a little different from conventional posters. You need to submit your electronic poster in

- **ONE** PowerPoint slide
- **Portrait** orientation (**landscape will not be accepted**)
- saved as a **PDF document (any other version will not be accepted)**

This ONE slide should contain the same content that you would display on a printed poster board display.
