Professional Certificate in Musculoskeletal Casting & Splinting

(Special Purpose Award; NFQ level 8; 30ECTS)

This is new Post Graduate Qualification to take place at Cappagh National Orthopaedic Hospital. The qualification is intended to provide specific, specialist knowledge and skills to Nurses working in Orthopaedic and Trauma Clinics / Units, which involve the treatment of injuries requiring immobilisation with Casts and Splints.

Casting and Splinting is done for the treatment of fractures, support healing and correct deformities. The care of a person in a cast is a practice requiring knowledge, skill and experience.

The Programme is credited by NMBI and consists of three modules combing theory and practice. It is a 2 day release programme run over 12 weeks, which will be held at the Education Centre, Cappagh National Orthopaedic Hospital.

Candidates undertaking the programme must have experience and be working in the area of Casting Techniques. For Programme detail and details on how to apply email:
